Australian Government Bureau of Meteorology
Western Australia

Western Australia Forecast

Issued at 4:30 pm WST on Saturday 16 February 2019
for the period until midnight WST Wednesday 20 February 2019.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call
1300-659-213* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation - Northern Western Australia

A surface trough extends from the inland Pilbara through the north Interior.
The western portion of the trough will move south into the Gascoyne from Monday.

Weather Situation - Southern and Central Western Australia

A deep trough over the far east of the State will move into South Australia
during Sunday. A high pressure system will develop south of the State during
Sunday and Monday, and a new trough will develop down the west coast. The
trough will move inland during Tuesday and Wednesday.

Forecast for the rest of Saturday 16 February

Showers and thunderstorms over the Kimberley, and parts of the Pilbara just
inland from the coast. Light showers possible near the south coast.

Forecast for Sunday 17 February

Showers and thunderstorms over the Kimberley, inland Pilbara and far northwest
Interior. Light showers possible near the south coast and Eucla coast. Very hot
over northern parts of the State.

Forecast for Monday 18 February

Showers and thunderstorms over the Kimberley, inland Pilbara, northeast
Gascoyne, and western Interior. Very hot over northern parts of the State.

Forecast for Tuesday 19 February

Showers and thunderstorms over the Kimberley, eastern inland Pilbara, far
northeast Gascoyne, Interior, Goldfields, eastern parts of the South West Land
Division and the western Eucla. Very hot over northern parts of the State.

Forecast for Wednesday 20 February

Showers and thunderstorms over the Kimberley, inland Pilbara, far northeast
Gascoyne, Interior, Goldfields, Eucla and central and eastern parts of the
South West Land Division. Very hot over northern parts of the State.

The next routine forecast will be issued at 4:45 am WST Sunday.
